22 Villeneuve, Business Park Smiths Grove, Ealing, London, W5 4LP, United KingdomQ:  
Parameterized fields aren't filtered I'm trying to filter Spinner by custom object's field, but all methods are NULL. I have an custom object, StandardUserObject. This object's fields are: objectName field value I'm trying to get objectName from ObjectSelectDialogSpinner and to filter StandardUserObject's where objectName like '%obj%'. Here is my code: public void setParameters(final FilterRow filter) { final List results = new ArrayList(); final String obj = filter.getTitle(); final List param = new ArrayList(); if (obj!= null) { final SPField objField = SPField.get(SiteCollectionObject.class, obj.toString()); if (objField!= null) { final Parameter paramObject = new Parameter() { public String getValue() { return objField.getFieldValue(); } }; param.add(paramObject); } } if (results.isEmpty()) { results = filterList.getFilteredItems(); } results.add(new FilterRow() { public String getTitle() { return "ObjectName"; } }); filterList.setFilter(new Filter("%" + results, param)); } In debug mode obj and paramObject fields are correct, but when standardUserObject.getFieldValue()
